

RYAN ROYAL TONG

(510) 292-6298 | rrtong@ucdavis.edu | rrtong.info | linkedin.com/in/rrtong | github.com/rrtong

EDUCATION

University of California, Davis
B.S., Computer Science
GPA: 3.333 / 4.000

SKILLS

Programming Languages:

C++
Python
C
Java
R
JavaScript

Web Development:

HTML
CSS
JavaScript
TypeScript
MySQL
AngularJS
Node.js
Gulp

Tools:

UNIX
SSH/PuTTY
Git
AWS
LaTeX

RELEVANT COURSEWORK

Data Structures & Algorithms
Theory of Computation
Operating Systems
Web Development
Scripting Languages
Artificial Intelligence

CREATIVE

Photoshop
Paint Tool SAI
MAGIX Vegas

EXPERIENCE

PowerSchool

June 2018 – August 2018

Software Engineering Intern

- Creating unit tests using Mocha, Chai, and Sinon to ensure proper functionality for product microservices.

UC Davis Student Startup Center System Administrator

September 2017 – December 2017

- Worked in a UNIX-based environment to maintain a virtual cloud server under Amazon Web Services.
- Installed necessary software to deploy and manage a NodeBB forum.
- Conducted design elements and implemented JavaScript plugins to enhance user experience.

UC Davis Computer Science Tutor

October 2017 – December 2017

- Supervised web development seminars to instruct and guide students to create personal websites.
- Coordinated with the CS department to organize teaching material to better educate students.
- Helped students through the difficulties of general CS concepts.

PROJECTS

flsys

February 2018

- Created a distributed file system for multiple UNIX-family machines to transfer messages between hosts.
- Utilized Python thread-based system to host servers, where every server runs a thread for each of its clients.
- Implemented read, write, open and close commands between clients through a server, given the permissions.

Medminder

January 2018

- Programmed and adjusted constraints on Xcode to provide a necessary medicine management application.
- Utilized Google Firebase to effectively gather and store user information on a real-time basis.
- Created digital assets with Photoshop to incorporate a simple and coherent user interface.

ChemQuest

May 2017

- Wrote C# and JavaScript scripts for three-dimensional object behavior in Unity.
- Designed an interactive chemistry lab simulator in a virtual reality interface.
- Exported to Android and iOS devices through Google Cardboard.

WeatherApp

April 2017

- Implemented a carousel graphical interface to view daily weather highlights.
- Extracted and formatted weather information based on zip code using Yahoo Weather API.
- Parsed JSON data queries and strings into the local server database to display for the user.
