RYAN ROYAL TONG

(510) 292-6298 | rrtong@ucdavis.edu | rrtong.info | linkedin.com/in/rrtong | github.com/rrtong

EDUCATION

University of California, Davis
B.S., Computer Science
Graduated June 2018

SKILLS

Web Development:
HTML • CSS • JavaScript
Node.js • npm • Gulp
Angular • TypeScript
React • JSX
MySQL
Sass

Unit Testing:
Mocha • Chai • Sinon
Jasmine • Karma • Phantom

Programming Languages:
Python
JavaScript
C++
C
Java

Tools:
UNIX • Command Prompt
Git
SSH • PuTTY
AWS
Kubernetes
Postman
Jira

HACKATHON PROJECTS

HackDavis   January 2018
Medminder
• Programmed and designed a user-friendly interface to assist medicine management.
Used: Xcode, Firebase

AT&T VR/AR   May 2017
ChemQuest
• Designed a virtual-reality chemistry lab to introduce education in a unique manner.
Used: Unity, Google Cardboard

EXPERIENCE

PowerSchool   October 2018 – Present
Associate Software Engineer
• Implementing front-end features to improve user experience through the main login page and user profile.
• Leveraging API calls to best interact with client-side microservices.
• Using Ping Identity to configure account credentials through a secure login system.

PowerSchool   June 2018 – October 2018
Software Engineering Intern
• Devised effective solutions for various front-end bugs in an Angular 2 environment.
• Created unit tests for TypeScript implementations to ensure proper functionality.
• Engaged in daily stand-ups and Agile sprint plannings to actively communicate and collaborate with the development team.

UC Davis Student Startup Center   September 2017 – December 2017
System Administrator
• Deployed and maintained a NodeBB forum under an AWS EC2 instance.
• Conducted design elements and implemented JavaScript plugins to enhance UX.
• Supervised web development seminars to direct students how to create and host personal websites.

UC Davis   October 2017 – December 2017
Computer Science Tutor
• Helped students through the difficulties of data structures, computational theory and C-family programming.
• Coordinated with the CS department to organize teaching material for students.

PROJECTS

rrtong.info   February 2019 – Present
• Remodeling my personal website using modern technologies including React.
• Designing an interface to value both user interactivity and aesthetic web design.
• Including original applications displayed within a contemporary one-page website.

flsys   February 2018
• Created a distributed file system for multiple UNIX-family machines to transfer messages between hosts.
• Utilized Python thread-based system to host servers, where every server runs a thread for each of its clients.
• Implemented read, write, open and close commands between clients through a server, given the permissions.

WeatherApp   April 2017
• Implemented a carousel graphical interface to view daily weather highlights.
• Extracted and formatted weather information based on zip code using Yahoo Weather API.
• Parsed JSON data queries and strings into the local server database to display for the user.
